Anti-Gravity Treadmill

Defy Gravity

Revolutionary body weight supported therapy.

Defy Gravity

The AlterG Anti-Gravity Treadmill® M300

When your patients are recovering from surgery or injury, the AlterG Anti-Gravity Treadmill offers a revolutionary approach to rehabilitation – the ability to defy gravity and work towards regaining function like never before. AlterG’s unique differential air pressure technology provides accurate, safe and comfortable partial weight-bearing therapy while promoting normal gait patterns.

The AlterG Anti-Gravity Treadmill expands the concept of “Weight Bearing as Tolerated” by offering precise unweighting in one percent increments to as low as 20 percent of the patient’s body weight. AlterG’s unique precision gives patients the ability to set the precise point where exercise becomes pain free and provides clinicians a way to accurately measure patient progress. AlterG is used and recommended by leading physical therapy clinics, hospitals, colleges and pro sports teams.

PATIENTS RECOVER AND PREFER ALTERG

The AlterG Anti-Gravity Treadmill provides precise early partial weight-bearing following injury or surgery to restore natural gait and range of motion. It enables neuromuscular and proprioceptive retraining that enhances balance and confidence, and improves gait and stride length. The AlterG also provides “prehab” conditioning with significantly reduced pain. Patients who try it overwhelmingly prefer it and 100% of those surveyed say they like it.

The Anti-Gravity Treadmill is FDA-cleared for:

- Rehabilitation following injury or surgery of the lower extremity (hip, knee, ankle or foot)
- Rehabilitation after total joint replacement
- Gait training in neurologic patients
- Strengthening and conditioning in older patients
- Weight control and reduction
- Sport specific conditioning programs
- Aerobic conditioning

“My patients can’t say enough about how good they feel to run again. I love this machine.”

Nancy Byl, PhD, PT - UCSF Physical Therapy and Rehabilitation Science

ATHLETES TRAIN LIKE NEVER BEFORE

The world’s best athletes and sports teams consider the Anti-Gravity Treadmill an essential part of their athletic conditioning and rehabilitation programs:

- Strengthens and improves coordination of muscles, which in turn protects surrounding joints.
- Promotes the full range of motion while minimizing stress.
- Enables injured athletes to maximize their fitness retention as they recover.

YOUR BUSINESS GROWS FOR \$499 A MONTH

As the only rehabilitation and training equipment of its kind, the Anti-Gravity Treadmill is redefining the practice of body weight supported therapy. Its growing recognition and popularity in the medical community can help you expand your practice through new patient referrals and additional patient visits. And, many clinics have found that this new approach to training and fitness has added cash-paying patients to their clientele. Now you can lease an AlterG for as low as \$499 a month*.

When you make the choice to defy gravity, you offer your patients the chance to recover better, and train like they never have before.

*Approximate U.S. bank rate 5 year leasing program subject to lender approval.

SPECIFICATIONS

MODEL	M310	M320	MODEL	M310	M320
PERFORMANCE			DIMENSIONS		
- User weight range	85 - 400 lbs	85 - 400 lbs	- Length	84 inches	84 inches
- Body weight adjustment range	0 - 80% reduction*	0 - 80% reduction*	- Width	38 inches	38 inches
- Body weight adjustment increment	1%	1%	- Height	74 inches	74 inches
- Speed range	0 - 8 mph	0 - 12 mph	- Weight	750 lbs	750 lbs
- Speed adjustment increment	0.1 mph	0.1 mph**			
- Incline range	0 - 5 degrees	0 - 15 degrees			
- Reverse	No reverse	3 mph			

* Maximum body weight reduction is limited to 65% for user weights above 320 lbs
** For speeds above 10 mph, increment changes to 1.0 mph
