

Features

- Laser & TENS therapy in one package
- High performance 650nm, 25mW visible laser
- Compact TENS unit
- Ergonomic and light weight
- Fully compliant with international Laser Safety Standards

The Laserex LaserTENS 2000 (Vis) therapy unit is one of the most compact, high performance visible laser/TENS therapy units available. The unit is suitable for use by physiotherapists, veterinarians, chiropractors, doctors and acupuncturists to treat a wide range of ailments.

The LaserTENS 2000 (Vis) treatment times are relatively short compared to conventional laser and TENS therapy alone. This is due to the higher laser power density and the simultaneous application of the two technologies.

The unit utilises a single 650nm, 30mW laser diode which produces a power density of 250mW/cm² with penetration depths of up to 15mm.

The LaserTENS 2000 Vis is a Class 2 laser product. With a weight of only 85 grams (including batteries) the unit can be conveniently carried in a coat or jacket pocket. All Laserex laser therapy units are supplied with batteries and include a 12 month warranty.

Specifications:

Laser:

Laser Wavelengths	650nm
Laser Output Power	25mW
Laser Power Density	250 mW/cm ²
Laser Class	Class 2

TENS:

Pulse width	3 – 80µsec adjustable
Pulse repetition rate	45Hz
Pulse Amplitude	150Volts

General:

Battery Type	3 x 1.5 Volt N Cells
Battery life	4 hours continuous use

This product is compliant with European and Australia/New Zealand laser safety standards 73/23/EEC - 98/37/EG, 89/336/EEC, EN 50081-1, EN-31252, EN-31252, EN 55022, EN 60825-1 and AS/NZS 2211:1997.
